

CHASE THE HORIZON

YEARS OF INNOVATION AND CRAFTSMANSHIP

MORE THAN A DECADE AGO WE PROMISED TO BUILD THE BEST BOATS IN THE WORLD.

WE'VE KEPT OUR PROMISE.

Our company was founded on a commitment to quality that guides us to this day. We are the only company in the world that manufactures its boats exclusively in-house, overseeing every aspect from start to finish, meeting or exceeding certified industry benchmarks and the standards for most globally recognized organizations. We keep meticulous records so there are never any surprises. Our ever-evolving quality-control measures ensure we always live up to our promise to build the best boats in the world.

DESIRABLE

REMARKABLE

DESIGNED TO GO THE DISTANCE

Audits

In our mission to deliver the highest-quality products to our customers, AB Inflatables submits the entire manufacturing processes to rigorous evaluations by third-party auditors. This means building under the strict surveillance of our quality certifications – NMMA for the USA, CE for Europe and ISO 9001 quality standards.

Traceability

Every boat we build comes with a unique history report that documents when it was made and the materials used. This quality-control system has helped us improve our production procedures and make significant product improvements throughout more than 50 years in business.

Innovation and Craftsmanship

AB Inflatables produces a full line of inflatable boats with the exceptional quality our customers have come to expect. Even the smallest details are handled with care. Everything we make is 100% handcrafted in-house, including the hull, tubes, rigging and inboard engine installations.

CHASE THE HORIZON

Born in 1969, AB Inflatables have over 50 years of non-stop production. Today, We are proud to say that our products have touched almost every corner of the globe and have earned the trust of thousands of customers.

Our vast network of representatives worldwide provides quick responses with a personal touch. We select companies known for their technical expertise, commitment to quality work and superior customer service. Customers will be backed up around the world with a high sense of collaboration through our network partners.

Our superior rigid inflatable boats (RIBs), manufactured with the highest quality materials and attention to detail, are recognized and admired worldwide. Designed for recreational use, commercial operations and jet segments, they are available in over 80 models.

Every AB model has a unique forward hull design that creates a raised bow and enhances performance by enabling easier planning with less horsepower. This allows the boat to cut through wakes and chop, virtually eliminating spray. The result is a smoother, more stable, and drier ride than any other inflatable boat on the market.
